## Aleo Mining Status

AleoPlan

*In the ALEO roadmap, it was announced that a total of approximately 25 million coins will be rewarded from the 1st to 3rd stages to the companies participating in the TEST NET phase. The number of countries participating in TEST NET 2nd stage is 94, and 440,000 PROVERs connected to the network, recording 750 million pps.*

*ALEOPLAN is participating in TEST NET stages 3 and 4, and its **mining ranking is 5th** with a mining quantity of approximately 1.2 million pps, recording around **1 million COINBASE Rewards** as a validation reward, bringing it one step closer to qualifying as a validator.*

## ZERO - Knowledge

- *An encryption protocol that allows verifiers to prove something to the other party through questioning. without revealing what is true*

If a sentence is 'true'

The verifier should not know anything other than the 'true' statement

- Zero-knowledge proof is used not only for the purpose of confidentiality but also for the anonymity of users and transaction information

## ZERO - Knowledge

*Existing blockchain technologies such as Bitcoin and Ethereum record transaction information between transaction parties publicly.*

*The **zero-knowledge proof** ensures the protection and anonymity of transaction information, garnering high expectations as a next-generation blockchain technology*

If a sentence is 'true'

The verifier should not know anything other than the 'true' statement

- Zero-knowledge proof is used not only for the purpose of confidentiality but also for the anonymity of users and transaction information
